

ARDUINO BASED SMART CANE

Suitable For

 visually impaired individuals in everyday indoor and outdoor navigation.

HOW IT WORKS

OBSTACLE DETECTION

Detects obstacles in front and on the ground.

AUDIO ALERT

Buzzer sounds when an obstacle is detected.

VIBRATION ALERT

Vibration motor alerts the user silently.

EASY TO USE

Simple ON/OFF switch for convenient use.

RECHARGEABLE

Powered by 18650 rechargeable battery.

&
Information Technology**

**ARDUINO BASED
SMART CANE**

WHAT'S INSIDE

ultrasonic sensor
HC-SR04

Arduino nano

vibration motor

buzzer module

ON/OFF switch

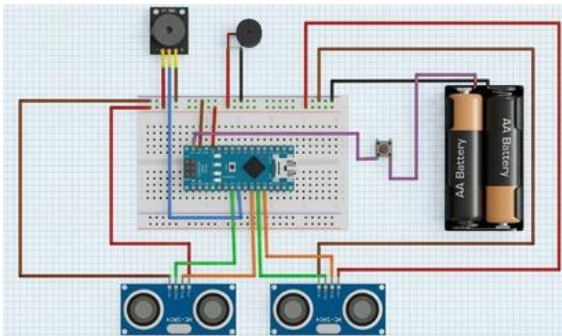

18650 battery &
holder

charger &
wires

HOW WE CONNECT

WHY WE MADE IT

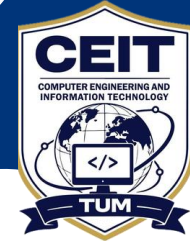

To help visually impaired people move more safely and independently by detecting nearby obstacles and providing instant sound and vibration alerts.

OUR GOAL

Safer Steps , Greater Independence.

WHAT WE AIM FOR

- * Improve walking safety
- * Detect obstacles in real time
- * Provide simple and instant alerts
